OBJECTION TO THE DRAWINGS

The drawings stand objected to. In particular the Office asserts that drawings do not show every feature of the invention as specified in the claims.

In particular the Office asserts that the "spherical roller bearing", "the supporting members are provided with respective sleeve", "bearing plates on the underside of the slab", and "jack screw" are not shown.

The Applicant submits a new Fig. 17 based on a blow up of drive assembly 8 as in Fig. 9. The Applicants submit that new matter is believed to have been added by the addition of Fig. 17. Corresponding amendment has been made to ¶ 0108 of the Specification based on ¶ 0014 of the Specification.

Further, the Office indicates that several reference marks are duplicated in the Specification. The Applicant has

amended the figures and the Specification to remove duplicate marks.

Withdrawal of the objections is respectfully requested.
